
Floor Drain—Watts DD1

Watts DD1 deck drain is a three piece unit designed for flat roof membranes installed onto wood substrates. This product relies on a clamping system for waterproofing, with the Deckrite Canada membrane being run into the body of the drain, then being fastened with a clamping ring and approved polyurethane sealant.

Features

Epoxy Coated
3 piece system: drain, clamp ring and grate
Easy installation
Fits standard joist spacings
Compatible with all Deckrite Canada membranes
