
Floor Patch—Planipatch

Mapei PlaniPatch is a high performance, polymer modified, fiber reinforced cement based skim coating and patching compound. This product is used to skim coat and smooth minor surface variations and defects that are common in decking substrates. PlaniPatch creates a strong, durable surface that is compatible with all Deckrite Canada membranes.

Features

Compatible with all Deckrite Canada membranes
Cement Based
Mixes to a smooth consistency

Technical Notes

Apply at temperatures above 5 degrees Celsius
Allow appropriate cure times
Refer to MSDS before use
